- Additional Hangar with Interior

History

Southport (YSPT) is a beautiful private aerodrome located just north of the picturesque Gold Coast in Coombabah (Queensland). The airport was founded in 1971 by a group of pilot enthusiasts with the first hanger being built shortly thereafter in 1972.

Situated at 5ft above sea level, Southport has one runway measuring 778 meters long which displaced thresholds at both ends due to trees. When flying circuits, they should be conducted to the western side of the runways and;

Runway 01 – Preferred for departures

Runway 19 - Preferred for arrivals

You will also find near the threshold of runway 19 the home to an abundance of wildlife, in particular hundreds of kangaroos. Don't forget to say hello to them when you next visit Southport.
